### PROFILE

With over 7 years of experience in web development, I have extensive expertise in SEO, responsive design, agile methodologies, and 2D/3D web animation. Additionally, I am proficient in backend development with SQL and NoSQL databases, enabling me to comprehensively manage the technological needs of any project.

I possess strong skills in hosting and domain management, ensuring an efficient transition of projects to production environments. My approach is focused on delivering high-quality solutions, prioritizing performance, functionality, and an exceptional user experience.

---

### WORK EXPERIENCE

#### Web Development

Costa Rica | 2018 - 2025

Currently, I work as a freelancer specializing in the development of websites, with a focus on creating intuitive and user-friendly UI/UX designs.

#### People and Omnilabs

Costa Rica | 2021 - 2022

Developing solutions as a web developer from design to production, working on company websites, information pages, fintech and crypto.

  - Mailjet
  - Wufoo
- 

### EDUCATION

#### Development and Engineering

Platzi | Udemy

#### Computer engineering

Universidad Hispanoamericana  
Costa Rica | 2015-2021

### Hobbies

In my free time, I am passionate about exploring new technologies and staying updated with the latest scientific and technological news. I enjoy creating personal projects that allow me to apply and experiment with these innovations. I am also a big fan of series and movies of all kinds, and I love music, which helps me expand my creativity and perspective.

Video games, including virtual reality games with Oculus, are another one of my passions. Some of my personal projects have been inspired by the video games I enjoy the most. Additionally, when I have time, I like to write a fantasy book. I haven't finished it yet, but I would like to share it online in the future.
